## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 17 is objected to because of the following informalities: it claims dependency, but does not specify what claim it is dependent upon.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22, 24-30, and 32-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over LOVEGROVE ET AL (EP 0136042 B1).

LOVEGROVE ET AL discloses a method and apparatus for removing residual gas from a shipping container. A gas inlet valve (15) and a gas outlet valve (16) (see Fig. 3) are connected to a control means (12). The control means controls purging of the atmosphere inside a receptacle (10) by blowing air into it through the inlet means, then removal of the interior gas, such as CO<sub>2</sub>, to a predetermined level below ambient pressure (see column 10:23-57, 11:30-37)

Art Unit: 3721

LOVEGROVE ET AL does not disclose the extraction and purging means being used through an end door of a container.

However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the system of LOVEGROVE ET AL on containers with an end door in order to provide more efficient handling and increased throughput for the containers.
